

## Year 1 Spring 1 Science- Animals Including Humans

### Key Facts

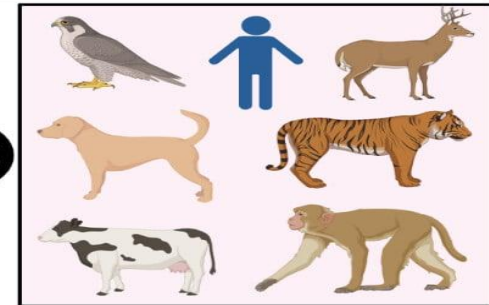

1. Reptiles are cold-blooded, have scales and usually lay eggs.
2. Fish are similar to reptiles but also have fins and use gills to breathe under water.
3. Birds are warm blooded, lay eggs and have feathers and wings.
4. Amphibians can live on land and in water, but their skin stays wet, they are also cold-blooded and lay their eggs in water.
5. Mammals make milk, are warm blooded and have hair or fur; humans are part of this group.
6. Carnivores are animals that eat only meat, herbivores eat only plants, but omnivores eat both.

### **Cold-blooded and Warm-blooded animals**

**VS**

### Scientific Skills

- Ask questions in science lessons
- Observe
- Collect information
- To record my results

### Key Vocabulary

- bird
- fish
- amphibians
- reptiles
- mammals
- carnivore
- herbivore
- omnivore
- feathers
- gills
