

Year 2 Spring 2 Design and Technology – Moving Pictures

Key facts

- A mechanism is when two or more components act together to make an action take place
- A slider moves up and down, or left to right along a single track or line
- A pivot moves around in a circle, staying in one position.
- A lever is a bar that moves at a point
- A book or story with a moving picture allows for the reader to interact on another level with the book
- Traditional Tales are very good for creating moving images – the Gingerbread Man running, Jack climbing the beanstalk or Little Red Riding Hood walking through the woods

slider

lever and pivot

pivot

Vocabulary

- slider
- pivot
- lever
- mechanism
- push
- pull
- turn
- rotate
- direction

What you need to make a...

Pivot

- hole punch
- split pin
- card

Slider

- scissors
- card
- glue

Lever

- hole punch
- split pin
- card
