

Year 4 Summer 2 Science- Scientists and Inventors

Key facts

1. A conservationist is a person who works to protect and care for the environment and living things.
2. A plant or animal that has not many of their species left.
3. If something is solar powered, it means that it runs off the energy we get from sunlight
4. Gerald Durrell was a conservationist who worked hard to save Madagascar's unique plants and animals.
5. Alexander Graham Bell was a Scottish scientist and inventor. His most famous invention was the first telephone.
6. West and Sessler invented an efficient microphone which is used in most modern phones.
7. Maria Telkes was a famous scientist who made a lot of discoveries around solar power
8. Garrett Morgan was an American inventor, famous for inventing the first modern gas mask and the first three-signal traffic lights.

Scientific skills

- Using observations and ideas to suggest answers to questions

Key Vocabulary

- conservationist
- endangered species
- solar powered
- respiration
- oxygen
- inventors
