

Year 6 Spring 2 Art – Digital Media: Layering

Key facts

- Digital media is digitised content that can be transmitted over the internet or on computer networks
- This can include text, audio, video and graphics
- Layering is the action of arranging something in layers
- Layers are used in digital image editing to separate different elements of an image
- Layering involves images being applied and then placed over or under another image
- Today layers are an integral part of image editors
